

Sister Light Wi-Fi _Table lamp

Sister Light Wi-Fi is a table, portable, rechargeable battery-operated lamp that can be remote controlled using the Zafferano Lighting app.

On the head, a touch control allows you to turn it on/off, dim (4-step: 100%, 60%, 30%, 6%) and select the color temperature of the light.

With its IP65 rating, the lamp can also be used outdoors; it is salt spray resistant (1500 h). It features an electronic control system that monitors the remaining autonomy and ensures a constant luminous flux until the battery runs out. Recharging is therefore optimized and always properly done. It can be recharged by unscrewing the top and positioning it on the contact charging base, included. It can be recharged also by positioning the whole lamp on the contact charging base. Battery charger not included.
