

Poldina _Wall

Poldina is a rechargeable battery-powered cordless wall lamp. A "touch" control on the head allows switching on/off, dimming, and selecting the color temperature of the light (2200 K, 2700 K or 3000 K). It is suitable for both indoor and outdoor use. An electronic control system monitors the remaining autonomy and ensures a constant luminous flux until the battery runs out. Recharging is therefore optimized and always properly done. The lamp comes with magnetic head, which can be removed easily and recharged conveniently on their own contact charging base; the battery charger is included. It can be customized with a ceramic cover, to be purchased separately.
